

## KEYNOTE SPEAKER BIOGRAPHY

Brothers, we're thrilled to announce that this year's keynote speaker will be our own Andrew Becker (Beta Pi '09)! Andrew is a long-time member of our chapter, having served as a Chapter President, and has stayed involved for many years as a graduate volunteer and advisor with the fraternity.

Andrew received his Bachelor's of Science in Computer Science from Bradley University and continued on to get a Master's of Science from the Georgia Institute of Technology in 2020. Since receiving his master's, he has been a lecturer for the Institute, teaching graduate level courses in high performance computing, where he oversees a team of graduate teaching assistants in addition to his regular students. Quite literally, he teaches supercomputing!

Professionally, Andrew works for Allstate as an Engineering Manager in their Agency Data and Analytics group.

After graduating from Beta Pi in Spring 2009, Andrew joined our Board of Chapter Advisors, where he volunteered and assisted our chapter until 2016; he then transitioned to his local chapter at Hanover College (Tau), where he joined their Board of Chapter Advisors in 2018. He answered "the call" to serve as a Section Leader for Section XVII, overseeing Hanover College and Miami University of Ohio (Mu Upsilon), where he still serves our fraternity today.

Andrew lives in southern Indiana with his wife and family, enjoying life and friends. He's looking forward to sharing about his fraternity experience and how it has shaped his life! As a graduate volunteer and Section Leader, he has many stories to share, and we appreciate his willingness to speak at our upcoming Pig Dinner.
